Problem Set 10

[Your name] and [student ID]
MAT1841-2021

1 Student feedback

Your peers will be giving in-class presentations for their term projects. In lieu of a final problem set, I will be asking you to give written feedback to your peers, in addition to any questions that may arise during the in-class presentations.

Please submit peer feedback to Quercus in a copy-and-pastable format so I can easily compile together feedback for each presentation and forward it to them. e.g. Plain text works, or if type-set in LaTeX, please also provide the tex source.

For every one of the presentations, please provide a few sentences for each of the following:

- At least one positive comment about the presentation.

- A question about the material.

- A suggestion, either for improving the presentation, or for a related topic that would be interesting.
